

Infuse Bone Graft Lawsuit Website Launched By Hissey Kientz, LLP Law Firm

The law firm of Hissey Kientz, LLP announces the launch of its new website, Medtronic Bone Graft Lawyers (<http://medtronicbonegraftlawyers.com/>). A Yale University Study has linked the Medtronic Infuse Bone Graft to severe complications including excessive bone growth, paralysis and male sterility.

Austin, TX ([PRWEB](#)) July 01, 2013 -- The law firm of Hissey Kientz, LLP is announcing the launch of its new website, Medtronic Bone Graft Lawyers (<http://medtronicbonegraftlawyers.com/>). The site will serve as a source for news and legal information for patients and their families who have experienced complications after receiving a Medtronic Infuse Bone Graft during surgery.

A [two-year analysis](#) of Medtronic medical data conducted by prominent universities recently determined that use of the Infuse Bone Grafts during surgery is no more effective than traditional operations for spinal surgeries while creating additional risks. The analysis, published in the Annals of Internal Medicine on June 18th, 2013, linked the Medtronic Infuse Bone Graft to bone spurs, paralysis, retrograde ejaculation and urogenital problems.

Researchers also concluded that previous Medtronic studies praising the effectiveness of the Infuse Bone Graft involved bias and selective reporting.

The U.S. Food and Drug Administration (FDA) approved the Infuse Bone Graft in 2002 for use in spinal fusion surgeries in the lower spine only. However, a 2013 Bloomberg Businessweek [report](#) noted that Medtronic promoted “off-label” (unapproved) use of the bone graft in the upper spine and neck.

The FDA released a [notification](#) in 2008 warning that off-label use of the Infuse Bone Graft in the upper spine could cause excessive neck swelling, compressed airways, difficulty breathing, problems swallowing and nerve damage.

Patients who have experienced excessive bone growth, paralysis, osteolysis or male sterility after receiving a Medtronic Infuse Bone Graft may wish to speak with a lawyer to find out if they are eligible to file a lawsuit. For more information about whether you may have a case, contact the attorneys at Hissey Kientz, LLP by calling toll-free at 1-866-275-4454 or by email at [info\(at\)hkllp\(dot\)com](mailto:info(at)hkllp(dot)com).
