Los Angeles Unified School District's Solar Site Surveys Services Request for Proposals

In support of its energy conservation program, the Los Angeles Unified School District ("District") is seeking proposals from firms to provide solar site surveys services to assess and evaluate potential sites for suitability, safety and desirable levels of energy output for solar photovoltaic systems ("District RFP"). The scope of services for the District RFP includes providing written recommendations for site suitability based on factors such as commercially available solar photovoltaic arrays with 200 watt (minimum) panels; structural integrity of roof and sub-structures; equipment location, maintenance, repair and access; environmental conditions; and utility services interconnection. The District intends to select four or more consulting firms and will award master task order contracts for each project with one-year option periods. With an estimated total of 120 potential sites, the District anticipates each selected firm to conduct between 20 to 30 site surveys. Consultants awarded contracts for solar site surveys services

Mandatory Pre-Proposal Conference:

July 1, 2009, 2:00 P.M.

Los Angeles Unified
School District Central
Office

333 S. Beaudry Avenue,
23rd Floor, Room 23-180
Los Angeles, CA 90017

shall not be eligible to participate in future solar photovoltaic installation requests for proposals for potential sites. All firms intending to respond to the District RFP must register at the District's website: <http://laschools.org/employee/fcs/rfq-rfps>.

If you are interested in learning more about the District RFP or have questions regarding this or other opportunities, please contact Patrick Perry, Emily Murray or Kaylynn Kim. We are attorneys at Allen Matkins Leck Gamble Mallory & Natsis LLP, a law firm in Los Angeles. Our practice includes assisting renewable energy clients with all aspects of their business, from siting and permitting, to compliance and litigation. To that end, we think your company may be interested in this renewable energy opportunity. We would be happy to tell you more about our renewable energy practice and expertise.

Sincerely yours,

Patrick Perry, Emily Murray and Kaylynn Kim
