Los Angeles Department of Water and Power Solar Photovoltaic Systems And Professional Services Request for Proposal

The Los Angeles Department of Water and Power ("LADWP") has issued a Request for Proposal ("RFP") from qualified and experienced firms to provide photovoltaic systems and professional services. The RFP is for materials and services necessary to develop 200 megawatts of solar power capacity over three years, according to the schedule below, beginning in November 2009. LADWP will award three-year contracts to multiple firms who can furnish solar power system components, provide technical training, and perform system integration design services.

Each firm is to act as a prime contractor and will be responsible for subcontracting as necessary. During the three-year contract term, specific sites (roof, parking lot, open field) will be offered to all contracted firms for competitive proposals. The firm with the best proposal and lowest life cycle cost will be granted a notice to proceed for that specific site to provide design, system materials and components kit, building permits, field installation support, start-up support, component warranties, and a system performance guarantee. LADWP Construction will receive materials at job sites and install systems per contract design; and LADWP Engineering will manage the overall project. Task proposals will be repeated for each specific site or group of sites until completion of the 200 megawatts or expiration of the contract terms, whichever is earlier.

Proposer's Conference:

June 30, 2009, 9:00 A.M.
City of Los Angeles
Department of Water and Power
111 N. Hope Street, Level "A"
Auditorium, Los Angeles, CA
90012

Proposals Due:

August 4, 2009, 2:00 P.M.

Description	Projected Date
RFP Advertised	June 2009
Proposals submitted	August 2009
Contracts awarded	November 2009
Design and deliver 50 MW	November 2010
Design and deliver 75 MW	November 2011
Design and deliver 75 MW	November 2012

If you are interested in learning more about the LADWP RFP or have questions regarding other opportunities, please contact Patrick Perry, Emily Murray or Kaylynn Kim. We are attorneys at Allen Matkins Leck Gamble Mallory & Natsis LLP, a California law firm with seven offices statewide, including Los Angeles. Our practice includes assisting renewable energy clients with all aspects of their business, from siting and permitting, to compliance and litigation. To that end, we think your company may be interested in this renewable energy opportunity. We would be happy to tell you more about our renewable energy practice and expertise.

Sincerely yours,

Patrick Perry, Emily Murray and Kaylynn Kim
