Using Macs in a Law Firm: Learn How at Two Live Events

I gotta admit. Apple's new Macbook Airs have me drooling.

I'm a big believer in running businesses with Macs, and put my money where my mouth is: Rocket Matter, the legal practice management software company I founded with Ariel Jatib, is an all-Mac company.

Ultimately, the reason Macs make sense to me for small business is because I don't have to think about them. They run and don't break. And if they do, I have a genius bar in my town who can bail me out. If you combine Mac usage and web-based software, there's very little IT that can get in my way.

Wanna live the dream and run your office on Macs? Join us for **two upcoming events in the very near future**:
