Through this program, a set number of hours per month will be established depending on the particularized needs of the client to assist the business with their legal and strategic needs; be it contract development, drafting and negotiations, employment agreements, regulatory compliance, business strategy or other matters that small and mid-sized businesses regularly encounter.

WEALTH: The primary purpose of an estate plan is to specify the ultimate recipients of your property, to designate the persons necessary to carry out your dispositive wishes and to nominate persons to act as guardians of any minor children. In carrying out these purposes, an estate plan is also designed to reduce the impact of federal estate and gift taxes.

We offer several custom will-based and trust-based planning options for individuals, professionals, business owners and families.

We also offer unique Wealth Memberships for the individuals or families who want their planning documents to always reflect their life, their assets and the law.

Additionally, we offer membership plans for the business owner who has a small company or corporation that needs to be maintained for maximum protection from liability, wants to ensure the estate plan documents always work,
