

Great Legal Marketing With Boyd Butler

Here's a new tip for you.

You know [Google Local](#) right?

And if you've done what I suggested
you are probably making good money
out of it.

But have you done the same for Bing?

Because in my books Bingers are Buyers.

So it makes sense to get yourself on
the Bing local version for the UK.

You can do this so easily...I don't even have
to make a video to show how it's done.

Just click [here](#)

And follow the instructions...

PS for all you employment lawyers
using the World Cup to sell your services
take a look at this

How many ways can you present information
that makes it more interesting?
