

Safe Fall Driving Tips

Fall has arrived with its display of fallen leaves and beautiful sunsets. Despite of all of that, the fall season also means that you need to be very careful when driving, as fall presents some different circumstances for operating a vehicle. Here are the driving safety suggestions that one need to think about before getting behind the wheel this fall. By following these safety suggestions for driving this fall season, you can make sure that you will not need a [car wreck lawyer](#) to help you. A car wreck is nearly always avoidable; however, if you end up in that situation, a [vehicle accident lawyer](#) is being a reliable source to turn to.

Beware of the fallen leaves on the road - You should be considerably careful when you are driving through a place blanketed with leaves. The fallen leaves on the road can cover up risks including black ice and potholes, so you should be alert when driving over them. Also, you need to avoid driving by a pile of leaves on the ground. This is extremely important, since children often love to play in and around these piles of leaves. You should not leave your vehicle by a pile of leaves, as the leaves can catch fire from your car exhaust or your catalytic converter.

Fall brings a big change in the weather conditions- Don't forget that clouds, rain, and fog can decrease your visibility. In these conditions, you should ensure that your headlights are on low, and you are maintaining a good traveling space between your vehicle and the vehicle in front of you.

Be aware of light levels outdoors - During fall, the mornings tend to be darker longer, and the evening hours get darker quicker. Also, it is safe to keep a pair of sunglasses in the vehicle, as the vibrant sunsets can reflect a reflection that can make it hard to see momentarily if it hits your eyes.

Repair particular car service issues- Your car might need replacement of things that are needed to be properly functioning during the fall. Make sure that your windshield wipers and headlights are functional. Replace them, or get them fixed if they show any signs of not working.

Be aware for school zones- When driving near a school; be sure that you are aware of how fast you're going. The vehicle speed shouldn't go over 25 mph when you are crossing a school zone during the morning, during school recess, and during the time when students get out of school. Schools back in progress will also mean added traffic in the school vicinity, including buses, parents of children and teen drivers. You must also be super alert when going past school buses because kids will be getting on and off the bus.
